

WINNARD

PRODUCT QUALITY REMINDER

Without specialised measuring equipment or knowledge of brake drum manufacturing, it is impossible to ascertain the engineering quality of a part purely based on its visual appearance.

Recent market incidents should be a reminder to the C.V. distribution network that quality control is paramount to ensure continued product conformity.

Winnard Goods Inward Quality Control

Failed after-market Scania drum ref; DVSA investigation Jan 20

Does your brake drum supplier check the quality of the parts they supply you ?

WINNARD has been manufacturing brake drums for over 90 years. We have the knowledge, experience, quality control procedures and engineering technology to ensure our parts meet the quality standards required for such safety-critical components.

You cannot judge product conformity by appearances alone.

The correct dimensional characteristics are critical to ensure safe operation.

*You can count on **WINNARD** to supply you safe effective braking products.*

Look for the **WINNARD** name on your braking products

You may find cheaper products in the market, but at what cost to your business!
