CHANGE OF OEM SAF SKRS BRAKE DRUM DESIGN

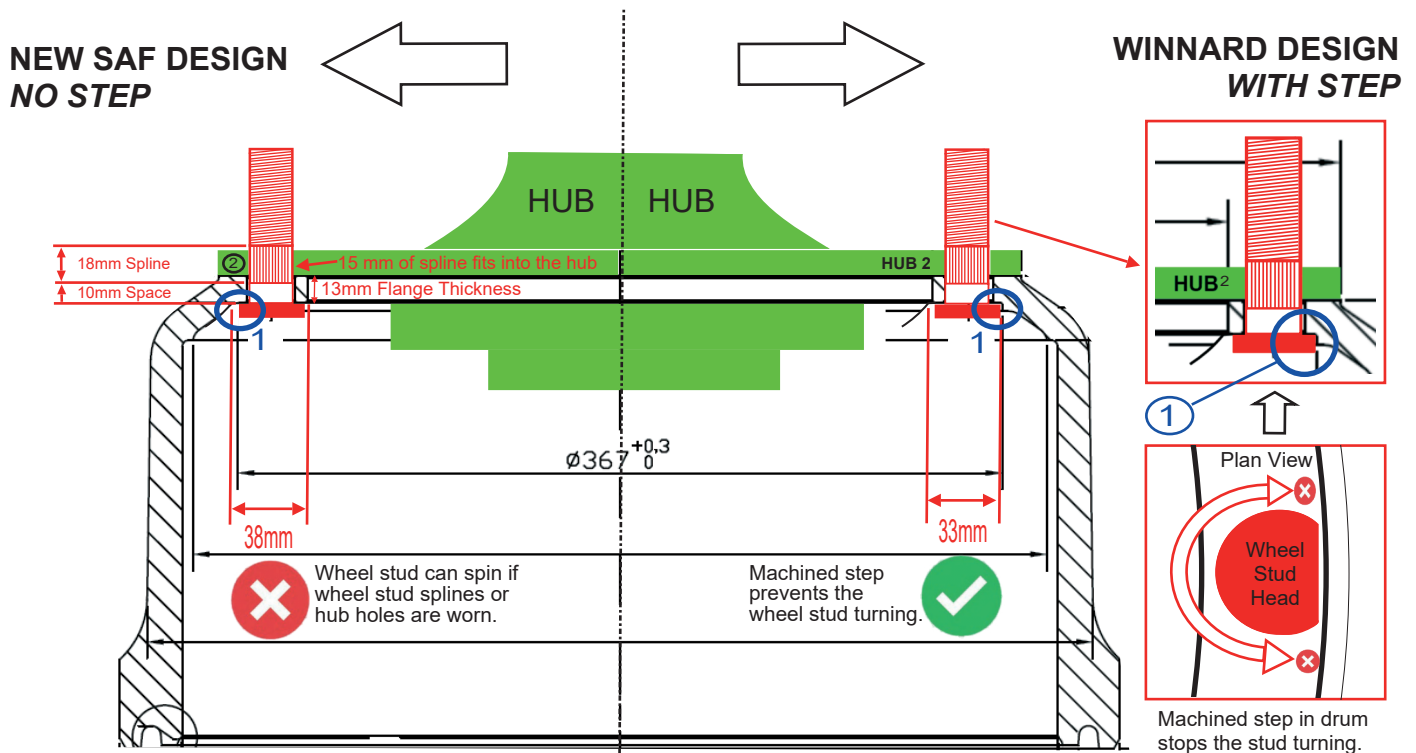

OEM PART No.: 1064026000, 1064026001, 1064026002, 1064026012, 10640260020 & 106402700

WINNARD PART Numbers.: SAU1011 & SAU1013

DESIGN CHANGE DETAILS:

SAF has changed the design of this brake drum. The stud location step on the underside of the stud face has been removed, see area (1) in the illustration below. The wheel stud is designed to have an interference fit into the hub (2). The location step in the old brake drum design helped to prevent the wheel stud from rotating as its interference fit into the hub loses resistance.

We understand this change has been made to prevent unsuitable, worn, components from being re-used.

Winnard will continue to supply the old design with the stud location step but the new design is also available, our part number is SAU1011NS & SAU1013NS.

Disclaimer: Winnard recommend that the condition of all components being re-fitted are checked to ensure safe operation, if in doubt consult with the Original Equipment Manufacturer and or replace worn parts as required.
